

Berkeley Castle Covid 19 - Tenant Update

4 - April 5, 2020

With the province's latest announcement on April 3rd, the note below reflects how Berkeley Castle is addressing the most recent changes. As usual, we ask that this be forwarded to all your staff so that they can also be properly informed.

Building Access: For safety and security reason, we will continue to have a staff person available 24/7 at the building. For tenants still coming to work (essential services) we would like you to contact management. We are for the time being leaving the entrance to 2 Berkeley unlocked 7am to 7pm weekdays but expect this will change once we know who exactly is still coming and going. In the upcoming weeks, we will likely be asking all people who come to the building to either have their own key (or garage swipe card) or call well in advance to arrange for access.

Suite Access requests: Starting this week, we would like to commence performing security/safety checks inside each and every suite in the building. We will clear mail piling up at your door, check your fridge, kitchen taps, and anything else that could be perceived as hazardous. We will do a handful a day and commence our inspections with tenants who have already asked us to do so. We ask that you contact us as soon as possible if there is something special you'd like us to check on, or if you DO NOT want us to access your suite.

Important resource:

This is worth repeating in every email - <https://www.toronto.ca/home/covid-19/>

Heartwarming video: We are very lucky to work in a building that is in one of Toronto's most diverse and inclusive neighbourhoods. A local Esplanade group made a short video for their neighbourhood to help bring people together in this difficult time. It is moving – absolutely worth “clicking”.

Here is their facebook link:

[MASK IMAGE on next page down](#)

How to wear a reusable mask

01 Wash your hands with soap and water for at least 20 seconds.

02 Ensure the mask is right side out with the part intended for your nose on top.

03 Secure strings or elastic around your ears or behind your head so that mask fits your face without any gaps.

04 Ensure the mask covers your nose and chin.

05 Bend nose fitting to contours of your nose (if your mask has one).

06 Don't touch the mask while you're wearing it.

07 Wash your hands again before removing.

08 Remove from the back without touching the front.

09 Ideally clean in the washing machine before next use.

10 Wash your hands a final time.
