

## Berkeley Castle Covid 19 - Tenant Update #50 - February 28, 2021

### Photos from last week after the snowfall:

... I was overwhelmed with submissions (NOT), which led me to deduce that everyone was just too busy outside enjoying the fresh snow and sunshine to send photos 😊.

### Vaccines approved in Canada :

- On Friday, [two AstraZeneca vaccines](#) were approved in Canada. With more vaccines now approved, you might be wondering about the [differences](#) ( [video](#) ) between the different vaccines.
- The [Johnson & Johnson](#) vaccine was just approved in the US, and it looks like we are not far behind. This is [how it differs](#) from the other vaccines.
- The provincial government has announced a [time line](#) for vaccination dates.
  - o After March 15 for those over 80
  - o After April 15 for those over 75
  - o May 15 - over 70
  - o June 1 - over 65
  - o July 1 - over 60
  - o May 1 for essential workers
- Some [positive facts and news](#) about the vaccine roll-out in Ontario, and some thoughts that with the addition of the AstraZeneca vaccines, we will get our vaccines [faster](#) than the time line above.

“The best vaccine for an Individual, is (the) one that you can get”  
*Health Canada chief medical officer Dr. Supriya Sharma*
